

## What is a budget?

When you get money, what do you plan to do with it? How much money do you spend on snacks? Or clothing? Sometimes when we see how much money we actually spend on things, we realize we'd rather be spending it on something else! A budget is a tool to help plan your future spending so you know exactly where your money goes. Try it out! What was the last thing you spent money on? How much do you THINK you spend on that thing in a month? Track your spending for a month and see if you were correct!

The last item I purchased was \_\_\_\_\_.

I think I probably spend \$\_\_\_\_\_ on that item each month.

After tracking my spending, I actually spend \$\_\_\_\_\_ on that item each month!

To learn more about budgeting, watch this short, animated video through the QR code on the right.

## Think before you spend!

Have you ever bought something and then regretted spending the money? Maybe the item wasn't as fun as you expected, or was cheaply made and fell apart. This is called "buyer's remorse," and it's a common problem. Ask yourself these questions before spending so later you won't wish you had that money back.

### There is something cool I want to buy. Is it...

Important to me?

Something I can afford?

Something I've planned for?

**Then yes! Get it!**

**– OR –**

**Do I only want it because it's...**

On sale?

Something a friend also bought?

Something I think I'm supposed to want?

**Just leave it at the store!**

## Taking care of your stuff

Have you ever had to spend money replacing something that broke? A great way to save money is to take care of the stuff you already have! Accidents happen, but by putting your things away, keeping track of where you leave them, and treating them carefully you can reduce your chances of your money going to waste!

Issue 27

MIDFIRST BANK

## What is saving?

*Did you know kids can save money?  
It's true!*

### Determining MidFirst Bank's iSave Match:

1. Add together each month's highest single deposit  
(in example 1, this equals \$600)
2. Then determine the monthly average  
(in example 1, this equals \$50)
3. MidFirst matches 50% of the average, up to \$25  
(in example 1, 50% equals \$25)

	Example 1	Example 2
Jan.	\$50	\$30
Feb.	\$50	\$30
March	\$50	\$30
April	\$50	\$30
May	\$50	\$30
June	\$50	\$30
July	\$50	\$30
Aug.	\$50	\$30
Sept.	\$50	\$30
Oct.	\$50	\$30
Nov.	\$50	\$30
Dec.	\$50	\$30
<b>Total</b>	<b>\$600</b>	<b>\$360</b>
<b>Average</b>	<b>\$50</b>	<b>\$30</b>
<b>x50%</b>	<b>\$25</b>	<b>\$15</b>
<b>Match</b>	<b>\$25</b>	<b>\$15</b>

Saving is a great way to buy something bigger that you don't have enough money for right now. If you get a few dollars for doing chores, but don't have enough to buy the thing you really want, save those dollars instead of spending them on something you want less! Then, the next time you get a few dollars, save those too, and before long, you'll have enough to buy the amazing thing you really want.

So where do you put the money you're saving? It's important to pick the right spot! People put their money in a bank to keep it safe while they are waiting to spend it. Not only will your money stay safe, you can also earn a little bit of interest. Interest is money added to your savings account by the bank. And with an iSave account, you also get a match! The chart to the left demonstrates how to maximize your iSave match. **Pretty cool!**

## Online safety corner

Be sure to practice smart online safety whenever you're online.

- Never share personal information, including your bank account number, Social Security number, home address, or school name, with people who contact you online
- Protect your passwords and don't share them with friends or strangers
- If anything or anyone makes you feel uncomfortable, talk to a trusted adult right away

Watch a short, animated video about online safety by scanning the QR code.

## Tangled Fishing Line

Oh no! The wind has tangled all the fishing lines. Can you help untangle them? Write the coin's value that goes with each fishing rod in the blank spaces.

Then you spent that  
dollar on candy from  
the store

Then that cashier used that  
dollar to buy a book from a  
neighbor at a garage sale

Maybe you got a  
dollar for doing chores  
at your house

Then the store used that  
dollar to pay the cashier  
who works there

Then that neighbor  
gave the dollar to their  
kid for doing chores

## What is the Economy?

The economy is the way people spend and make money.  
Let's trace money through the local economy in your neighborhood!
